SPIES FC

FilmChassis

WHY?

SPIES FC is the completely recyclable monomaterial-alternative to our SPIES PC and features a combination of injection-moulded skeleton with minimal wall thickness, thanks to the use of thick film.

INNOVATIVE!

To protect valuable resources, SPIES FC combines the advantages of two technologies in a new kind of packaging: injection moulding combined with film extrusion. Thanks to the monomaterial, the bucket is ideal for the circular economy.

MINIMUM INPUT - MAXIMUM FUNCTIONALITY

In addition to the proven and superior quality of our injection-moulded packaging, you benefit from further advantages:

- Weight reduction
- Optimal design options and transparency
- Verified leak-proof due to plastic seams
- Optional usage of recycled material
- Reduction of material use
- Completely recyclable thanks to monomaterial

INDUSTRY

Universally applicable, food, delicatessen, dairy, specialty chemicals, technology

DESIGN

Your desired article geometry can be customised.

STRATEGY / REASON

- ✓ Maximum weight reduction
- ✓ Conservation of resources
- ✓ Optimal recyclability
